## Laptop/Chromebook Standards / Specifications

---

For a variety of reasons, we strongly recommend that students use Chromebooks rather than a standard laptop. Chromebooks should meet the following specifications:

1. 4 GB of Memory (RAM) or better
2. 32 GB Solid State Drive (SSD) or better

### For PC Laptops

1. Hardware:
  - 10<sup>th</sup> Gen Intel or Ryzen 5 processor or better
  - 8 GB of Memory (RAM) or better
  - 500 GB Solid State Drive (SSD) or better
2. Operating System (OS):
  - Windows 10 and 11

### Other Items

1. Head Phones (Over-Ear Recommended)
2. Wireless Mouse (Recommended for K-5)
3. Charger (Students should have their charger with them every day)

These specifications and editions are to be considered the **minimum** requirements

*Apple products (including iPads) should not be purchased by families for use in the classroom.*
